Plenary Meeting

On November 6th the plenary meeting of "Gender and Diversity in VET" was held in Vienna. The partners presented their achievements at that moment, problems that occurred were discussed and the partners assisted each other to develop the products further.

Validation and Adjustment of the Products

During the last months the partners of Gender & Diversity developed and created products such as:

- A manual for gender sensitive education
- Didactic guidelines and recommendations for using these materials
- An implementation concept

To upgrade and correct these products and materials, different organisations and target groups in Romania, Slovenia and Turkey tested the outputs. After this important phase, the products were adjusted and improved once again and the production of the final versions started.

Implementation

The products will be implemented in the target countries Romania, Slovenia and Turkey. As this project and its outputs may be interesting for other organisations, policy makers and actors as well, new ways of divulging the project and the ideas behind it have will be discussed in various national meetings to secure the future application.

Multiplier Conference

To give organisations and actors, who weren't part of the project until now, the chance to be informed about Gender & Diversity, a multiplier conference is planned. More information on it will be given in the next newsletter.

The partnership consists of a well balanced team of seven operational partners from six countries supported by a number of strategic partners in the target countries receiving the transferred products.
