

The European dimension of the project. Invitation to the Multiplier conference

Better Building

Certifying VET teachers
as energy saving advisers.

A transfer system into
three different European
societies

Validation and adjustments

The project partners designed and developed products such as

- modular curricula,
- didactic guidelines,
- implementation concepts

which will soon be available to download free of charge for non commercial use at www.better-building.eu

Those products were tested by different target groups and organisations in Italy, Romania and Turkey. The given feedback by participants and stakeholders was used to adapt and finish the products.

After adjusting the products and creating final versions, the production in each country started. Now a new, essential phase in the project is imminent – the implementation phase.

Implementation of the project outputs

This important phase is supposed to find ways to distribute products and plan the future of the project's outputs which means to continue working effectively with the developed results.

The products may be reproduced by other organisations, actors, target groups or policy makers who have to be identified first and approached.

The future of the project is very important and will be planned carefully to secure a further use in partner organisations and new participants.

Multiplier conference

For organisations and actors who have not been involved in the project until now, a multiplier conference is planned to take place in June 2009, in Italy.

Better Building

Partnership:

The project partnership consists of 7 organisations in 6 countries.

Promoter:

IAL CISL Emilia Romagna

Via Montebello 2

40121 Bologna

www.ialemiliaromagna.it

Coordinator:

BEST Institut für berufsbezogene

Weiterbildung und Personaltraining GmbH

Mariahilfer Str. 8, 1040 Wien

office@best.com,
