## EDITORIAL

### **The European dimension of the project. Invitation to the Multiplier conference**

During the last couple of months the developed products of the project were tested in Slovenia, Romania and Turkey by different organisations and target groups. Feedback was given by participants and the products were adjusted and adapted. After finalising the products and commissioning the production, a new important phase is raring to go – the implementation phase.

**The main objective** of this transfer project is to sensitise and inform VET teachers working with disadvantaged persons about the possibilities of introducing self directed learning into their teaching practice.

### **Partnership:**

 The project partnership consists of 7 organisations of 6 countries.

 and the support of strategic partners in Slovenia, Romania and Turkey

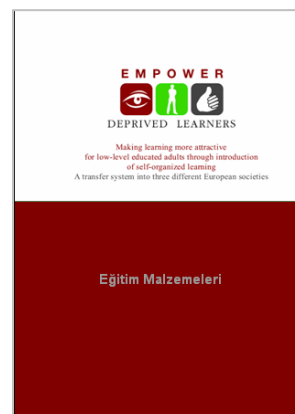

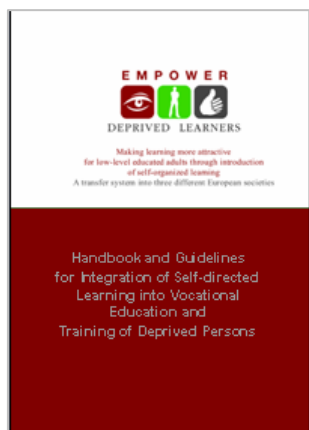

## Implementation phase

The products will be implemented in the target countries: Slovenia, Romania and Turkey.

The future of this project is very important and therefore new ways of distributing the results and products have to be found. The products may be interesting for other organisations, target groups or policy makers. For those the project website [www.empower-deprived-learners.eu](http://www.empower-deprived-learners.eu) offers a free of charge download possibility for non commercial use where further information and contact details are also available.

## Multiplier conference

Organisations, from different European countries, which were not involved in the project until now, will have the chance to attend a big multiplier conference. There they will be informed about the whole project and the developed products. This event is planned to take place in Italy, in June.

..some of the project products.
