

The SFaB Virtual Learning Environment (VLE)

The technical backend for our platform, the Virtual Learning Environment (VLE), on which the SFaB training programme runs, was created by our Belgian project partner Candide. The platform is available to everyone free of charge at <https://training.sfab-project.eu/>. After registering, users have access to a simple and self-explanatory website, can access the free online course for self-study and acquire theoretical and practical knowledge. Various courses are available on this platform.

The target groups are family businesses, owners, employees in family businesses, managers in family businesses, adult educators, adult education providers and their lecturers, and women looking for entrepreneurial opportunities/training.

Users will participate in an accredited course, the course applies micro-credentials according to the current EU recommendations and the certification/accreditation strategy developed by BEST Institut für berufsbezogene Weiterbildung und Personaltraining GmbH. Upon successful completion of the course, course participants can automatically receive a certificate from the VLE. The certificate helps to prove the acquired knowledge and competencies to others
